Synopsis: Now in a newly updated and expanded second edition, "Thinking Parent, Thinking Child: Turning Everyday Problems into Solutions" by Myrna B. Shure (Professor Emeritus in the Department of Psychology at Drexel University in Philadelphia) shows her readers how to apply I Can Problem Solve techniques to the top concerns of parents and children from preschoolers through preteens. With updated research, three completely new chapters, and numerous new problem-solving scenarios, "Thinking Parent, Thinking Child" offers a sensible way for parents to help their children learn how to think, not what to think. This new edition also extends commentary on the problem-solving approach to include relevant research conducted since the book's first edition was published.

Critique: Exceptionally well written, and thoroughly 'user friendly' in organization and presentation, "Thinking Parent, Thinking Child: Turning Everyday Problems into Solutions" this new second edition is unreservedly recommended for both academia and non-specialist general readers with an interest in the subject. No professional, community, college, and university library Psychology of Parenting collection can be considered complete and up-to-date without a copy of this latest edition of "Thinking parent, Thinking Child".
